

Josiah deGrasse

Human Factors + AI Product Designer

Josiah.deGrasse@tufts.edu | [linkedin.com/in/josiahdegrasse](https://www.linkedin.com/in/josiahdegrasse)

I turn complex AI and technical workflows into clear, useful experiences. My work combines Human Factors research, interaction design, and rapid prototyping with AI development tools.

EXPERIENCE

New Food Innovation

Jan 2026 - Present

Human Factors / AI Product Design

Functional focus; position originally titled AI Product Engineer.

- Hired by the project sponsor to develop a Tufts capstone into a working sensory-intelligence platform for food-development teams.
- Designed a connected journey across instrument evidence, sensory studies, insights, product decisions, concept testing, and reports.
- Translated complex methodology into an explainable GO / TWEAK / STOP decision framework with evidence context and explicit human review.
- Shaped role-specific workflows and reviewable AI assistance; used AI development tools to prototype and iterate on the working product.

Red Hat OpenShift AI

Jan - May 2026

Product Designer - Senior Capstone

- Conducted 8 user interviews and stakeholder sessions to understand enterprise AI workflows and identify 3 validated design opportunities.
- Designed and tested two concepts: a source-grounded AI assistant and a rule-based workflow, using Figma prototypes.
- Refined the experience around visibility, source grounding, rollback, and human control; validated the design direction with Red Hat product leadership.

Helfrich Brothers Boiler Works

Jun - Aug 2024

Mechanical Engineer

- Designed production fixtures for robotic welders and CNC machinery, improving boiler-head throughput from 3 heads per 3-hour run to 8 per 45 minutes.
- Created 1,000+ SolidWorks components and digital twins to support fabrication, documentation, and shop-floor decisions.

EDUCATION

Tufts University

Bachelor of Science in Human Factors Engineering | May 2026

PRACTICE

Design & research: Human Factors, UX research, task analysis, stakeholder interviews, journey mapping, information architecture, interaction design, prototyping, usability testing, Figma.

AI & making: Human-in-the-loop design, evidence-based decision support, AI-assisted prototyping, data visualization, SolidWorks, CAD, 3D printing.

LEADERSHIP & COMMUNITY

Tufts men's lacrosse: contributed to three consecutive NCAA Division III national championships; founded a weekly team newspaper. Volunteer youth coach in Ridgefield and with Bronx Lacrosse.

Outside work: Sewing, sourdough baking, snowboarding, surfing, backgammon, and music technology.
